### **Turkiye Is Bankasi to Choose Fidelity Asset & Spent Management Solution**

**Istanbul-** Asseco South Eastern Europe (ASEE) announced today that Turkiye Is Bankasi selected [Fidelity®](#) to manage real estate and construction services. The project includes the delivery of Real Estate Management and Construction Services Management modules of Fidelity, which provides end to end management of the construction projects and management of rented or owned real estate assets.

I. Hakki Aksener, Head of Construction and Real Estate Management at Turkiye Is Bankasi said: “Fidelity has become an important contributor to the business processes and management of our bank and enables us to process the demand and services in a correct, fast and controllable manner.”

Emphasizing that Fidelity® has been preferred by 6 leading banks in Turkey, Asseco SEE Country Leader Hatice Ayas said: “We are happy to cooperate with Turkiye Is Bankasi and look forward to see business results. Also, I would like to mention that Fidelity is a modular solution developed according to the needs of banks and current asset management trends.

### **Remove burden on Real Estate and Construction Services Management with Fidelity**

Pointing out that Fidelity® solution has been developed specifically according to the business needs of banks in real estate and construction services, Hatice Ayas continued: “Managing real estate and construction projects is an additional burden for banks. Therefore, we provide the central management, reporting, and analysis of real estate assets through Real Estate Management. With Construction Services Management, we create cost savings opportunities for banks. The modular structure of the solution enables us to respond very quickly on demand.”
